OUR DIFFERENCE

Our privately chartered air tours are carefully planned and designed with you in mind. We're about creating amazing experiences, visiting unique places and meeting authentic local people, all crafted to your individual style, schedule and budget. When you choose to travel with Wagga Air Centre you are not part of a large 'one size fits all' tour group, your tour is as individual as you are. Our tours are uniquely designed and crafted to your tastes, creating lasting memories and inspiring stories that last a lifetime.

Our tour ideas in the second half of this brochure are offered to inspire you and can be tailored to suit your requirements, interests and budget.

We are very excited to launch our 'Self Fly Australia Air Tours', designed with the TBM aviator in mind. Our Self Fly Air Tours offer the same incredible comforts as our privately chartered air tours with one difference, they are a self-fly tour in our TBM850 aircraft. You fly in command under supervision of our TBM approved training and checking pilot who also acts as your exclusive coordinator whilst on tour.

Wagga Air Centre will guide you through the process of obtaining a 'temporary certificate of validation' that will permit a flight licence holder of an overseas authorisation to fly an Australian registered aircraft. The issue of the temporary certificate of validation is a quick process that is designed for pilots visiting Australia for a specific period of time or to undertake a specific operation.

You can fly as much or as little as you choose. Wagga Air Centre will provide the TBM850 aircraft and all the support with flight planning, airspace clearances, radio procedures, fuel planning, accommodation and tour bookings. Our Self Fly Air Tours are designed for the TBM pilot, and provide the perfect balance of flying, flexibility and fun.
